HWA 8

Price € 696,00

Identifier 8.060.310.31002

Description

The HWA 8 hot water dispenser is a double walled container made of high-quality stainless steel. It ensures you will have continuous and quick access to hot or boiling water because of the optimal insulation. By default, the HWA 8 can easily be filled with water manually lifting the container by using the provided handles. However, connecting the machine to a fixed water supply is possible too.

- 8 liters holding capacity
- The orange 100°C button brings the water to the boiling point
- ECO function for 4 liters of hot water when lower volumes are needed
- Descaling and other maintenance can be carried out quickly and easily
- This hot water dispenser is recommended for event locations, the hospitality industry and associations or community buildings
- Boil-dry and over-current protection

Specifications

Ingredients
- Water
