Reason for sending you this information

For our Esprecious 3.0 machine we have the following updates of the software.
The updates for the Esprecious 3.0 are available by type and can be downloaded from our website.

Software version 1.05 (24-06-2025)

► *This modification relate to the all Esprecious 3.0 machines.*

- the possibility to check the weight of an instant ingredient
- strength and volume controls now work correctly when switched on or off independently
- several text improvements in different languages
- added a screen for media specifications (background, banner, etc.), including size and file type
- reduced the water flow for hot water on the Americano recipe
- added a higher volume (900 ml max.) for the following drinks:
 - Lungo & double Lungo
 - Americano & double Americano
 - Chocolate & double Chocolate
 - Hot water
 - Hot milk
- added a high-pressure pump routine that activates the pump briefly if it hasn't been used for a while
- when installing the Esprecious with a FreshMilk unit, the milk pump calibration is added to the initial setup process
- option to choose a file when importing settings enabled
- the default number during grinder calibration has been adjusted. bugs fixed:
 - Grinder 1: 16,5 gram
 - Grinder 2: 20,5 gram
- minimum amount of coffee in drink setting is now 5 gram
- if an ingredient is changed, you now get a message that all beverages with that ingredient will be erased if you proceed
- solved bug when using settings via USB during first installation that grinder calibration was not mandatory
- grinders now need to be calibrated when a setting file is used during the first installation
- fixed a bug that occurred when calibrating beverages prepared in multiple cycles
- fixed a bug that occurred when cancelling a beverage
- fixed a bug that caused the software to freeze when adjusting the beverage volume
- fixed a bug in the brewer cleaning process when initiated from the quick menu

The first serial number produced with this update: **10056176**
